EA111. The EA111 series of internal combustion engines was introduced in the mid-1970s in the Audi 50, and shortly after in the original Volkswagen Polo. It is a series of water-cooled inline three- and inline four-cylinder petrol and diesel engines, in a variety of displacement sizes. This overhead camshaft engine features a crossflow cylinder head design. The bolts deform permanently when tightened. The rationale is simple: -More consistent clamping force - A given amount of clamping force can be achieved with fewer fasteners.
