James A. Hall Chapter 3 Accounting Information Systems, 4th.Ed. Ethics, Fraud, & Intern. Contr. Study Notes Prepared by H. M. Savage © South-Western Publishing Co ...Information systems (IS) are formal, sociotechnical, organizational systems designed to collect, process, store, and distribute information. In a sociotechnical perspective, information systems are composed by four components: task, people, structure (or roles), and technology.. A computer information system is a system composed of people and computers that processes or interprets information. Dear Twitpic Community - thank you for all the wonderful photos you have taken over the years. We have now placed Twitpic in an archived state. What is an Axon Hillock? Imagine for a moment that you are one of many departmental managers at a large business. Each department deals with something different, such as payroll or legal issues.
