8.1. Object Oriented Patterns. I am somewhat dubious of some of the the beliefs in the "object oriented" world. There's a little too much dogmatism, and the bold assumption that using OOP changes "everything" for the better. Even when the designs can be equally well described using a non-object oriented "notation.". There's actually a literature about the opposite: AntiPatterns: Refactoring ...Over the last several years, a number of authors [Garlan & Shaw 1993] [Shaw 1996] [Buschmann et. al. 1996] [Meszaros 1997] have presented patterns that characterize high-level software architectures, such as PIPELINE and LAYERED ARCHITECTURE. The concept known as the law of the instrument, otherwise known as the law of the hammer, Maslow's hammer (or gavel), or the golden hammer, is a cognitive bias that involves an over-reliance on a familiar tool. As Abraham Maslow said in 1966, "I suppose it is tempting, if the only tool you have is a hammer, to treat everything as if it were a nail.". The concept is attributed both to Maslow ...Model View Controller (MVC) ?En español: Modelo Vista Controlador. Es un patrón de arquitectura de software que separa los datos y la lógica de negocio de una aplicación de la interfaz de usuario y el módulo encargado de gestionar los eventos y las comunicaciones.
