Australian reptiles list with pictures and facts. This page is part of our reptiles section: Reptiles: The Ultimate Guide. Australia is home to many amazing reptiles. It may be the smallest continent, but Australia is also the sixth largest country, and has plenty of different habitats to support a wide range of reptilian life. The fauna of Australia consists of a huge variety of animals; some 83% of mammals, 89% of reptiles, 90% of fish and insects and 93% of amphibians that inhabit the continent are endemic to Australia. This high level of endemism can be attributed to the continent's long geographic isolation, tectonic stability, and the effects of an unusual pattern of climate change on the soil and flora over ...and Reptiles of California: Currently Undescribed California Reptiles and Amphibians and Species of Possible Occurance in California Australian Reptile Park is a hands-on zoo located in a natural bush setting on the Central Coast of NSW, home to exotic reptiles from around the world and a wide variety of Australian native animals.
