

Download Bug Facebook

Facebook apologizes for bug that may have exposed photos of 6.8 million people. Facebook says the bug has been fixed but indicated some third-party apps “may have had access to a broader set of ...How the Facebook Bug Works. The principle behind the discovered Facebook bug is actually pretty simple. Every time a user creates a poll on the site the field values containing images are posted by sending a network GET request to the remote host location. Facebook is making a big shift to private messages, but it's not immune to security vulnerabilities. Imperva, a cybersecurity company, on Thursday detailed a flaw with Facebook Messenger that ...WPSD-TV, Paducah, Kentucky. 186,071 likes · 83,069 talking about this.
