The portion of U1-19 fed to the summing amplifier U3 varies from 0.74% to 100%. The summing amplifier multiplies this voltage by -12.2, so the signal at U3-6 will vary from 0.18 V p-p to 24.4 V p-p. moRFeus: A Low Cost Wideband Signal Generator and ... moRFeus: A Low Cost Wideband Signal Generator and Frequency Mixer During development of the Outernet project the engineering team developed several tools to help them in their RF testing. Are you sure you want to remove Build your own low-cost signal generator from your list? A signal generator is an important piece of electronic test equipment, but commercial signal generators can cost a bundle. With this book, you can learn how to generate almost any kind of electronic signal you need without emptying your wallet. Filled with interesting and useful subassembly projects, Build Your Low Cost Signal Generator.
