

Download Comparative Policy Research

The International Comparative Rural Policy Studies (ICRPS) program brings together an international, multi-disciplinary group of faculty, students, and professionals to study together the many facets of rural policy, from policy formulation to policy impacts. What Is CER? Comparative Effectiveness Research (CER) seeks to determine which medical interventions and strategies work best, for whom, and under what circumstances. Comparative politics is a field in political science, characterized by an empirical approach based on the comparative method. In other words, comparative politics is the study of the domestic politics, political institutions, and conflicts of countries. Social Work Research and Comparative Effectiveness Research (CER) A Research Symposium to Strengthen the Connection Background Information and Preliminary Considerations Introduction On November 16, 2009 the Social Work Policy Institute (SWPI) will convene a think tank meeting, Social Work Research and Comparative Effectiveness Research (CER): A Research Symposium to Strengthen the Connection.
