

Download Defense Security And Sensing 2015 Displays Sensor Data And Information

DSIT's Fiber-optic Sensing solution provides up to 50 km of a continuous surveillance per fiber optic processing unit through its advanced DAS (Distributed Acoustic Sensing) technology. No power infrastructure is required along the fiber optic cable. The Defense Advanced Research Projects Agency (DARPA) is an agency of the United States Department of Defense responsible for the development of emerging technologies for use by the military. Ubiquitous sensing enabled by Wireless Sensor Network (WSN) technologies cuts across many areas of modern day living. This offers the ability to measure, infer and understand environmental indicators, from delicate ecologies and natural resources to urban environments. Breaking Defense In your inbox.
