The Dosadi Experiment is a 1977 science fiction novel by American writer Frank Herbert. It is the second full-length novel set in the ConSentiency universe established by Herbert in his novelette The Tactful Saboteur and continued in Whipping Star. It was first published as a four-part serial in Galaxy Science Fiction magazine from May to August, 1977. Frank Herbert was phenomenal and we lost him all too soon. The Dosadi Experiment is a classic example of the work and imagination of Frank Herbert. He presents amazing characters- some that couldn't be more alien to us, yet the stories teach us profound lessons about ourselves. Pick this up. Read it several times. You'll get more out of it every single time. "Das Dosadi-Experiment" ist zwar nicht gerade ein Flop, aber weit von der Qualität der meisten Wüstenplanet-Romane entfernt. Mit dem Roman The Whipping Star (dt. als "Der letzte Caleban" bei Heyne) schrieb Frank Herbert (1920-86) den ersten Band der Caleban-Duologie. And so I come to Frank Herbert's 1977 novel The Dosadi Experiment. I read a review I liked and recalled the quality of his writing that I had enjoyed so much. Frank Herbert's Dune was a masterpiece, not just of the genre but of literature, it was and remains an amazing achievement., Dosadi Experiment Frank Herbert.
