

# Download How To Fold Combi Stroller

Pull up on the two levers on the handle at the same time while standing behind the stroller (as if you are going to push the stroller). The levers are found at the base of the handle bar near the canopy. This unlocks the stroller and it will start to fold. Roll the stroller on its back wheels while tipping it. It should now be folded once. Grab the child's tray at the front of the stroller and pull it toward you if the stroller does not fully fold on its own. This feature is not available right now. Please try again later. Most strollers fold by pushing the handles toward the front of the stroller, folding at the middle. The result is the handles sitting over the front wheels. They should have a latch that then locks the stroller closed., How To Fold Combi Stroller.
