

Download J1939 Comprehensive Guide

iAuto710 is a professional level diagnostic handheld tool, offering comprehensive system coverage for a vast array of car manufacturers. Featured with all system diagnosis including engine, transmission, ABS, Airbag, instrument, steering wheel, etc., and the most commonly required service features oil light/service reset, EPB, Battery configuration, diesel particulate service, throttle body ...The Suspect Parameter Number (SPN) is diagnostic fault code terminology found on some Caterpillar ® products using a J1939 CAN data link. The Society of Automotive Engineers (SAE) developed the J1939 standards and SPN code terms have been assigned for specific parameters (component or system circuits) that diagnostic trouble codes (DTC) are associated with.

F. Operation of the J1939 Engine Gateway. 1. Do I need two gateways for a twin engine setup? If the engines are connected to a single network (joined with a sync cable), one gateway is adequate for transferring data from all engines to the NMEA 2000 network.
