Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation. Java is a set of computer software and specifications developed by James Gosling at Sun Microsystems, which was later acquired by the Oracle Corporation, that provides a system for developing application software and deploying it in a cross-platform computing environment. Java is used in a wide variety of computing platforms from embedded devices and mobile phones to enterprise servers and ...eBook Details: Paperback: 312 pages Publisher: WOW! eBook (July 18, 2018) Language: English ISBN-10: 178913949X ISBN-13: 978-1789139495 eBook Description: Hands-On Natural Language Processing with Python: Foster your NLP applications with the help of deep learning, NLTK, and TensorFlowJava+You, Download Today!.
