Max Theodor Felix von Laue (9 October 1879 – 24 April 1960) was a German physicist who won the Nobel Prize in Physics in 1914 for his discovery of the diffraction of X-rays by crystals. In addition to his scientific endeavors with contributions in optics, crystallography, quantum theory, superconductivity, and the theory of relativity, he had a number of administrative positions which ...

Prof. Dr. Annette Jünemann is a lecturer and researcher in the field of International Relations, with a particular emphasis on EU foreign affairs. Her regional focus lies on the Mediterranean, the Middle East, and North Africa. In these contexts, she works on the following topics: Euro-Mediterranean Relations, Restoration, Transformation, and Democratisation; issues of the (external ...

Have you ever considered that there is a real self and an ideal self? In this lesson, you will discover the difference between the two, and the effect of two selves at odds.
