Pressure [MPa] Methane Pressure-Enthalpy Diagram0.1 1 10 100-1000 -900 -800 -700 -600 -500 -400 -300 -  
200 -100 0 100 200 300 400 500 Enthalpy [kJ/kg] Pressure [MPa] Methane Pressure-Enthalpy DiagramCooling  
Down •Cargo tank cooling-down reduces temperature into hold space or interbarrier spaces causing pressure  
drop. •Pressure drop into interbarrier or hold space should beThe constants of the Bender equation of state were  
determined for ethane and propane. For these two substances and for methane, ethylene and propylene pressure-  
enthalpy diagrams and tables of saturation properties were calculated., Pressure Enthalpy Diagram Methane.
